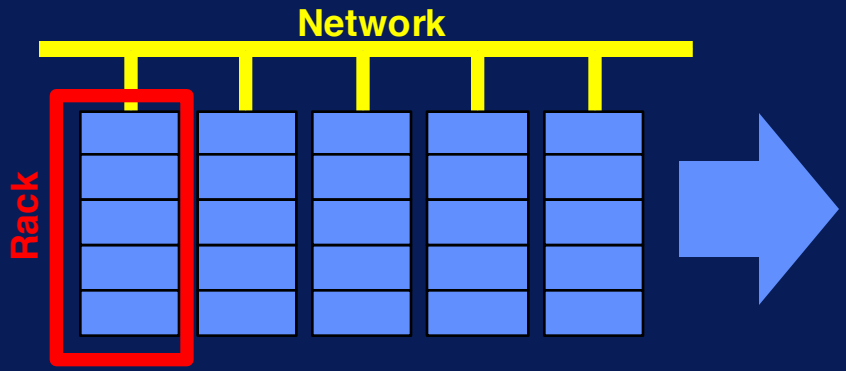
Programming Models for Big Data

After this video you will be able to..

- Explain the requirements of programming models for big data and why you should care about them

- Tell your friends how you can scale the speed of pasta sauce generation in your kitchen by applying big data programming models



Data-parallel scalability

Distributed File Systems

Requirements for Big Data Programming Models

1. Support Big Data Operations

Split volumes of data

1. Support Big Data Operations

Split volumes of data

Access data fast

1. Support Big Data Operations

Split volumes of data

Access data fast

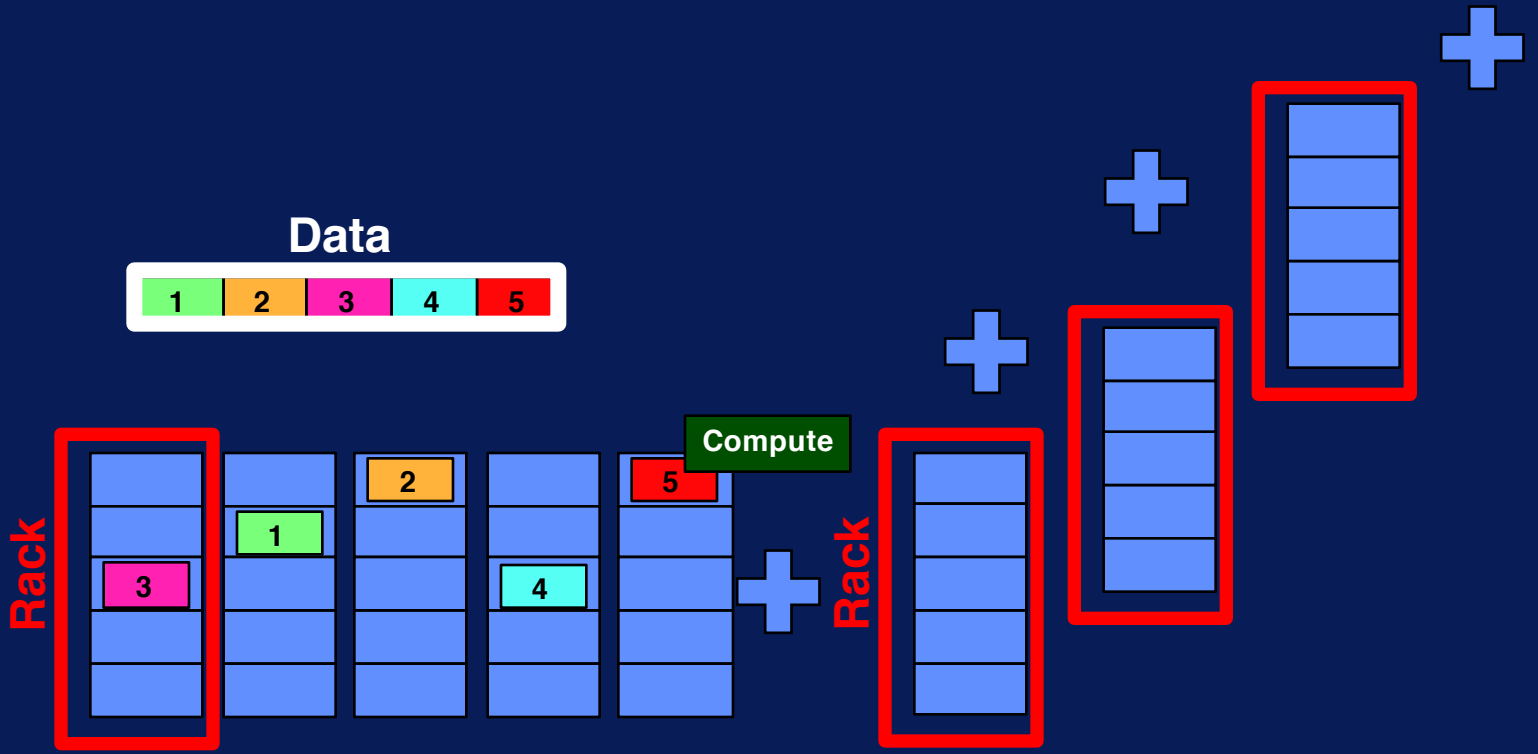
Distribute computations to nodes

2. Handle Fault Tolerance

Replicate data partitions

Recover files when needed

3. Enable Adding More Racks



4. Optimized for specific data types
